**PEAR TAWARA***PYRUS TAWARA ORIENTAL*Light: Full Sun  
Flower Color:HT: 15'-18'  
W: 15'  
Z: 4*White flowers in spring make way to the unusual dark tan to light brown fruit. The fruit tastes like a cross between apple and pear and has a crispy texture. Asian pear cultivars are partially self-fruitful, but better crops are set when two or more cultivars are planted together. European pears or Asian pears such as Seckel, Bosc or Bartlett can be used for pollination. Tawara Asian Pear is excellent for fresh eating or canning*
